

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: January 2026. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

December 2025

Locked

December 2025 is locked (closed 5 Jan 2026). These numbers won't change.

January 2026

Locked

January 2026 is locked (closed 3 Feb 2026). These numbers won't change.

October 2026

Incomplete

October 2026 is still in progress: figures to 6 Oct only.

January 2026

\$182

December \$173

January last year

\$200

40 new customers from \$8,000

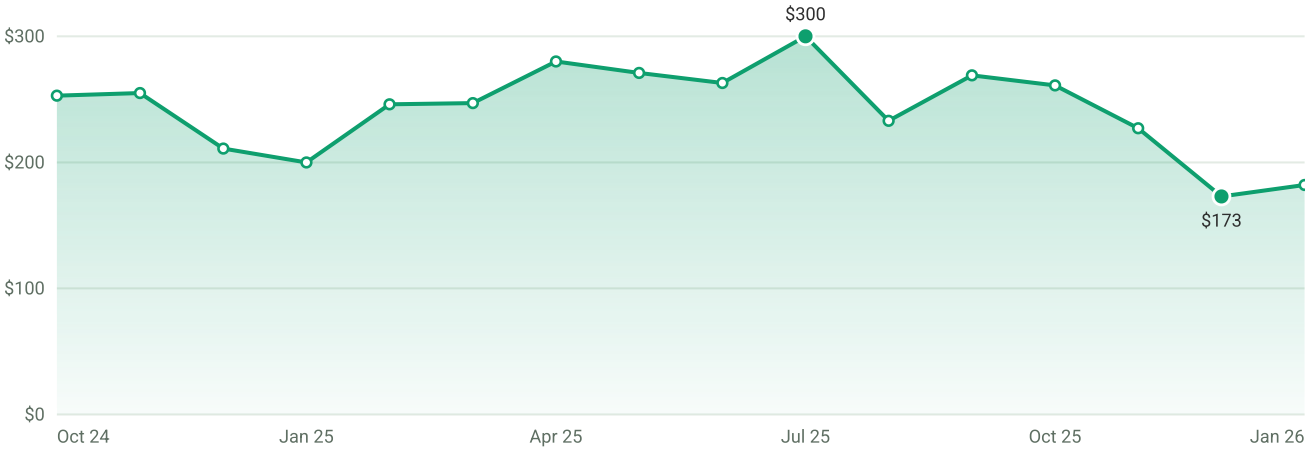

Year to date (Jul to Jan 2026)

\$228

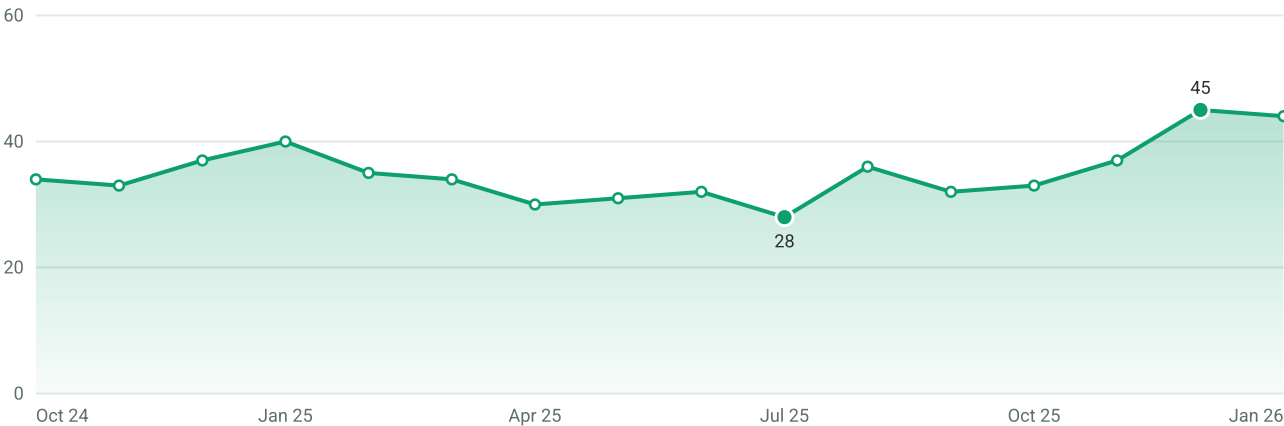

same period last year: not in the data

Cost to win a customer, by month

All · \$ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

44 new customers came from \$8,000 of marketing in January, against 45 from \$7,800 in December: \$182 each, up from \$173.

What you'd do about it

Worth knowing which channels brought this month's customers in: recording the source of each new customer shows the cost per channel.
