

SAMPLE DATA · invented figures for demonstration

## Which products and services are growing?

**Period: April 2026.** Revenue, gross margin and growth (year on year) by product or service line over 24 months. Pick a line and every number, chart and note follows it.

**How final is this data?**

March 2026

Locked

March 2026 is locked (closed 2 Apr 2026). These numbers won't change.

April 2026

Locked

April 2026 is locked (closed 5 May 2026). These numbers won't change.

October 2026

Incomplete

October 2026 is still in progress: figures to 6 Oct only.

## Trades

**Gross margin, not profit**

Gross margin is not profit. Job gross margin = revenue less materials, subcontractors and technician time charged to the job at \$68 an hour (wages and all on-costs). Not included: technician time not charged to any job (travel, training, waiting), and overheads (office wages, marketing, vehicles, rent, insurance, IT, depreciation, interest). Profit is what's left after those. Wages always include all on-costs: super, payroll tax, workers' compensation insurance and leave.

**From gross margin to profit**

April's jobs made \$68,843 gross margin (41.7%). Technician time not charged to jobs took \$6,456 and overheads \$59,290, leaving \$3,097 profit before tax (1.9% of revenue). To cover overheads, jobs need a 39.8% gross margin on average.

|                                                                            |              |
|----------------------------------------------------------------------------|--------------|
| Gross margin on jobs                                                       | \$68,843     |
| Technician wages and on-costs                                              | \$54,600     |
| Technician time charged to jobs (at cost)                                  | \$48,144     |
| Technician time not charged to jobs                                        | \$6,456      |
| Gross profit (the P&L)                                                     | \$62,387     |
| Overheads (operating expenses, depreciation, interest)                     | \$59,290     |
| Profit before tax (the P&L)                                                | \$3,097      |
| Revenue                                                                    | \$164,987    |
| Gross margin on jobs, %                                                    | 41.7%        |
| Profit before tax, % of revenue                                            | 1.9%         |
| <b>Gross margin jobs need just to cover overheads and time not charged</b> | <b>39.8%</b> |

## Line: All

April against April last year

**32.3%**

\$164,987 against \$124,705

Year to date (Jul to Apr 2026)

**\$1,610,581**

same period last year: not in the data

Gross margin, year to date

**37.6%**

\$605,185 before overheads

**What it shows**

Revenue is \$1,610,581 this financial year to date (Jul to Apr 2026). Maintenance contracts make the highest gross margin (59.5%); Installations the lowest (28.4%). The business needs 39.8% gross margin just to cover overheads.

**What you'd do about it**

Installations: 28.4% gross margin, 6.6 points under the 35.0% target: about \$66,763 on \$1,011,500 of revenue this financial year to date. It's below the 39.8% needed to cover overheads, too. Maintenance contracts: 59.5% gross margin, 24.5 points over the 35.0% target (\$87,069 ahead on \$355,300 this financial year to date).

## Line: Maintenance contracts
