

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: July 2026. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

June 2026

Locked

June 2026 is locked (closed 2 Jul 2026). These numbers won't change.

July 2026

Locked

July 2026 is locked (closed 4 Aug 2026). These numbers won't change.

October 2026

Incomplete

October 2026 is still in progress: figures to 6 Oct only.

July 2026

\$263

June \$215

July last year

\$300

28 new customers from \$8,400

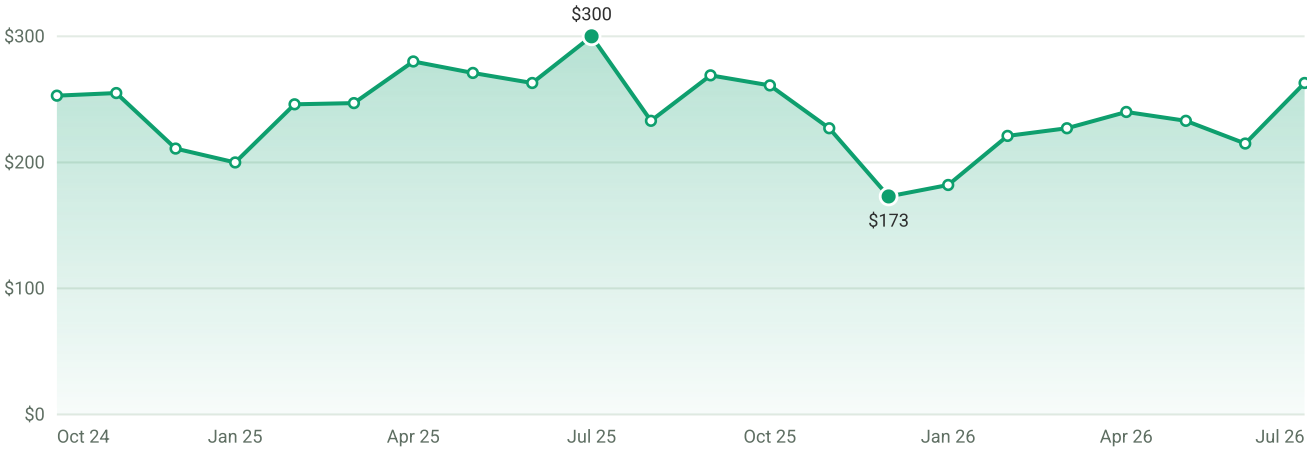

Year to date (Jul 2026)

\$263

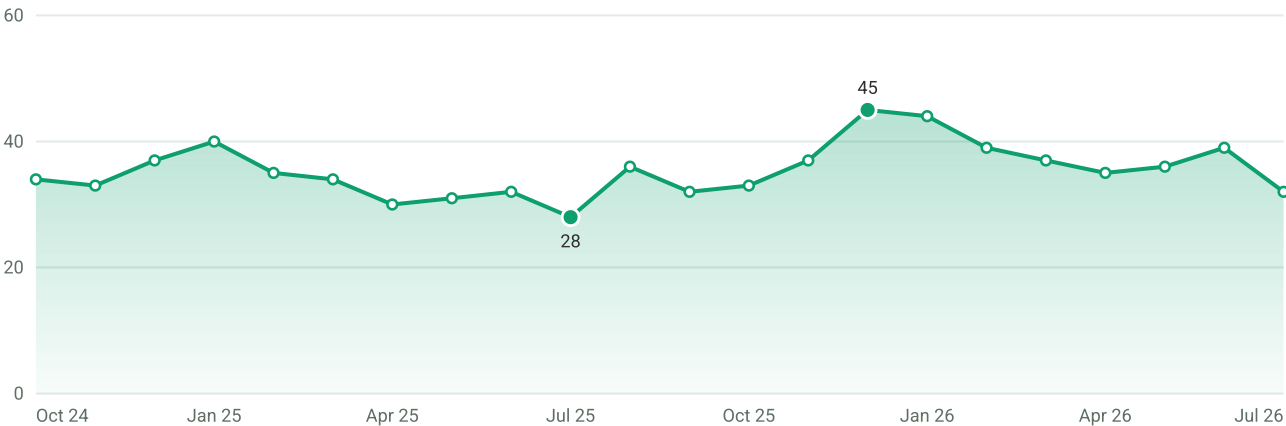

(12.5%) on the same period last year (\$300)

Cost to win a customer, by month

All · \$ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

32 new customers came from \$8,400 of marketing in July, against 39 from \$8,400 in June: \$263 each, up from \$215.

What you'd do about it

Worth knowing which channels brought this month's customers in: recording the source of each new customer shows the cost per channel.
