

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: August 2026. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

July 2026

Locked

July 2026 is locked (closed 4 Aug 2026). These numbers won't change.

August 2026

Locked

August 2026 is locked (closed 2 Sep 2026). These numbers won't change.

October 2026

Incomplete

October 2026 is still in progress: figures to 6 Oct only.

August 2026

\$205

July \$263

August last year

\$233

36 new customers from \$8,400

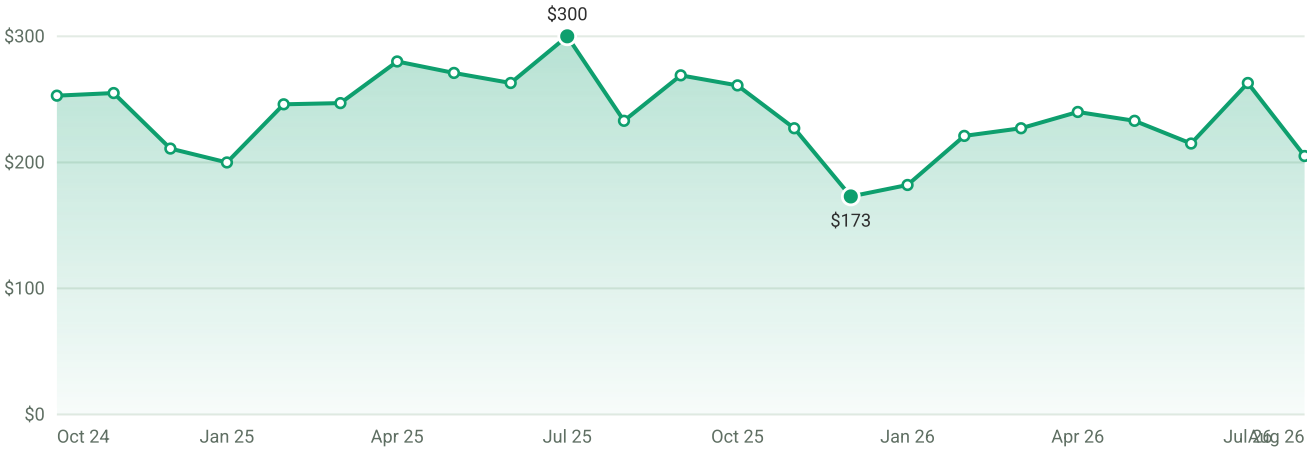

Year to date (Jul to Aug 2026)

\$230

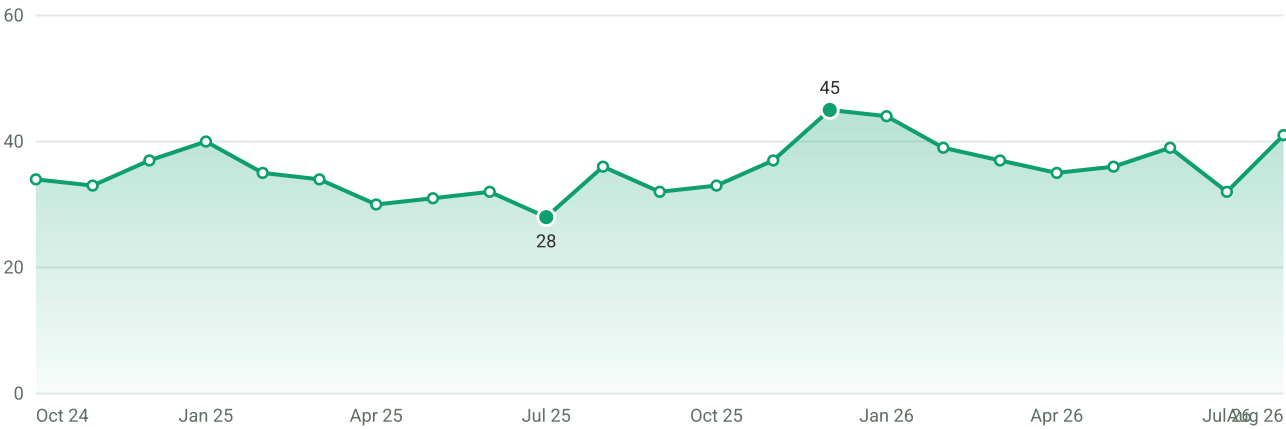

(12.3%) on the same period last year (\$263)

Cost to win a customer, by month

All · \$ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows

41 new customers came from \$8,400 of marketing in August, against 32 from \$8,400 in July: \$205 each, down from \$263.

What you'd do about it

A lower cost per customer with steady spend usually means the marketing mix is working. Recording where each new customer came from shows the cost per channel.
