

SAMPLE DATA · invented figures for demonstration

Will cash cover payroll next month?

Period: September 2026. A 13-week cash forecast from 30 September: cash at bank, plus what customers owe on their usual payment dates and new work at its recent rate, less pay runs, supplier bills, tax and finance on their due dates. Every day opens its workings.

How final is this data?

August 2026

Locked

August 2026 is locked (closed 2 Sep 2026). These numbers won't change.

September 2026

Locked

September 2026 is locked (closed 2 Oct 2026). These numbers won't change.

October 2026

Incomplete

October 2026 is still in progress: figures to 6 Oct only.

Cash at bank, 30 Sep
\$59,746
end of the day

Wages to pay in October
\$113,400
3 fortnightly pay runs

After the tightest pay run, 15 Oct
\$53,846
buffer: one pay run, \$37,800

Lowest point, next 13 weeks
(\$343)
30 November

What it shows
Cash at bank was \$59,746 at 30 September. October has 3 pay runs (\$113,400). The tightest is 15 October: \$53,846 left after paying wages, \$16,046 more than a pay run in reserve. The lowest point in the 13 weeks is (\$343) on 30 November.

What you'd do about it
18 invoices (\$8,963) are already past the customer's usual payment date; the forecast assumes they arrive within a week. Without them, 15 October would be \$44,883. October is one of the two months a year with three pay runs: \$37,800 more wages than a usual month. The PAYG instalment (\$7,017) is due 28 October.

How this forecast has done so far
For 5 October it said \$110,127; the bank says \$47,244, \$62,883 less. \$64,300 of it is 7 invoices expected by then and not yet paid, the largest Wacol warehouse switchboard (\$46,800).

Forecast for 5 October	\$110,127
Actual, 5 October	\$47,244
Actual – forecast	(\$62,883)
Of which: invoices expected by then, not yet paid	(\$64,300)
Everything else (timing of other money in and out)	\$1,417

Cash at bank, every day: actual to 30 Sep, then forecast to 30 Dec

All · Cash at bank \$

Lighter line = forecast. Customers are expected on their usual payment dates; new work at the last three months' rate; pay runs, supplier runs, interest, equipment finance and PAYG on their due dates. GST and BAS are left out of the sample. Every month, by line, is in the spreadsheet download.

October: where the cash comes from and goes (forecast)

13 weeks, week by week

Week ending	Cash at start	Unpaid invoices collected	New work collected	Wages	Suppliers and overheads	Tax, interest and finance	Cash at end	Lowest in the week
7 Oct	\$59,746	\$94,563	\$3,872	(\$37,800)	\$0	\$0	\$120,381	\$60,746
14 Oct	\$120,381	\$18,600	\$6,454	\$0	\$0	\$0	\$145,435	\$121,672
21 Oct	\$145,435	\$12,900	\$6,454	(\$37,800)	(\$55,080)	\$0	\$71,909	\$53,846
28 Oct	\$71,909	\$9,800	\$6,454	\$0	\$0	(\$12,017)	\$76,145	\$73,199
