# Which products and services are growing?

**Period: October 2026 to date.** Revenue, gross margin and growth (year on year) by product or service line over 24 months. Pick a line and every number, chart and note follows it.

How final is this data?

- September 2026

Locked

September 2026 is locked (closed 2 Oct 2026). These numbers won't change.
- October 2026

Incomplete

October 2026 is still in progress: figures to 6 Oct only.

Trades

Gross margin, not profit

Gross margin is not profit. Job gross margin = revenue less materials, subcontractors and technician time charged to the job at \$68 an hour (wages and all on-costs). Not included: technician time not charged to any job (travel, training, waiting), and overheads (office wages, marketing, vehicles, rent, insurance, IT, depreciation, interest). Profit is what's left after those. Wages always include all on-costs: super, payroll tax, workers' compensation insurance and leave.

From gross margin to profit

September's jobs made \$73,107 gross margin (36.1%). Technician time not charged to jobs took \$3,430 and overheads \$59,580, leaving \$10,097 profit before tax (5.0% of revenue). To cover overheads, jobs need a 31.1% gross margin on average.

|                                                                     |           |
|---------------------------------------------------------------------|-----------|
| Gross margin on jobs                                                | \$73,107  |
| Technician wages and on-costs                                       | \$54,600  |
| Technician time charged to jobs (at cost)                           | \$51,170  |
| Technician time not charged to jobs                                 | \$3,430   |
| Gross profit (the P&L)                                              | \$69,677  |
| Overheads (operating expenses, depreciation, interest)              | \$59,580  |
| Profit before tax (the P&L)                                         | \$10,097  |
| Revenue                                                             | \$202,337 |
| Gross margin on jobs, %                                             | 36.1%     |

Services

Gross margin, not profit

Gross margin is not profit. Gross margin = revenue less contractors and consultant time charged to the work at \$60 an hour (wages and all on-costs). Not included: consultant time not charged to clients, and overheads (management and admin wages, marketing, rent, IT, insurance, travel, depreciation, interest). Profit is what's left after those. Wages always include all on-costs: super, payroll tax, workers' compensation insurance and leave.

From gross margin to profit

September's client work made \$78,830 gross margin (59.8%). Consultant time not charged to client work took \$1,980 and overheads \$52,140, leaving \$24,710 profit before tax (18.7% of revenue). To cover overheads, client work needs a 41.0% gross margin on average.

|                                                                            |           |
|----------------------------------------------------------------------------|-----------|
| Gross margin on client work                                                | \$78,830  |
| Consultant wages and on-costs                                              | \$46,500  |
| Consultant time charged to client work (at cost)                           | \$44,520  |
| Consultant time not charged to client work                                 | \$1,980   |
| Gross profit (the P&L)                                                     | \$76,850  |
| Overheads (operating expenses, depreciation, interest)                     | \$52,140  |
| Profit before tax (the P&L)                                                | \$24,710  |
| Revenue                                                                    | \$131,850 |
| Gross margin on client work, %                                             | 59.8%     |
