

SAMPLE DATA · invented figures for demonstration

# Sample Distribution: Wacol DC

How final is this data?

Today (6 Oct)

Incomplete

As at 2pm, Tue 6 Oct 2026: deliveries still on the road are shown as on their way.

1–5 October

Provisional

October is not locked until 3 Nov: late proofs of delivery can still change it.

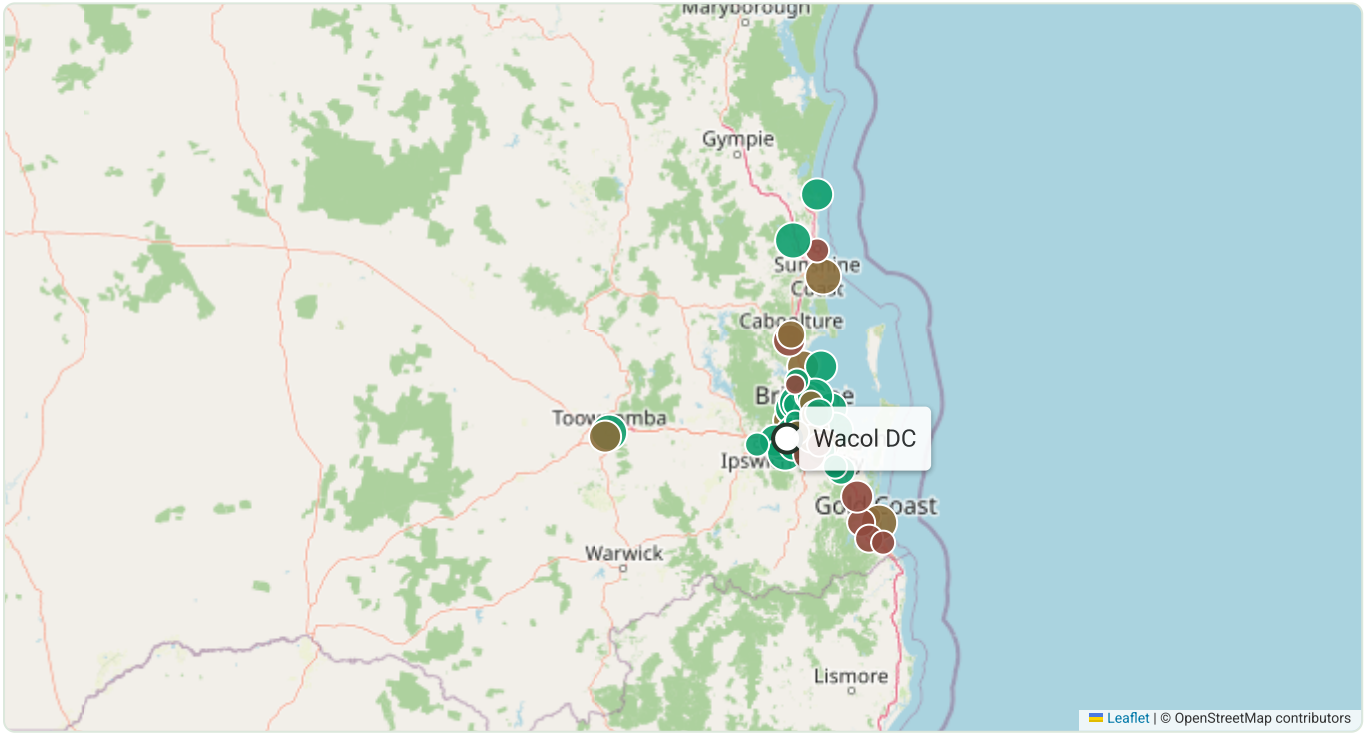

September 2026 and earlier

Locked

Closed. These numbers won't change.

## Deliveries out, to customers · last 30 days

|                   |                  |            |                  |                  |
|-------------------|------------------|------------|------------------|------------------|
| Deliveries<br>868 | On time<br>93.0% | Late<br>60 | Overdue now<br>1 | In full<br>98.0% |
|-------------------|------------------|------------|------------------|------------------|

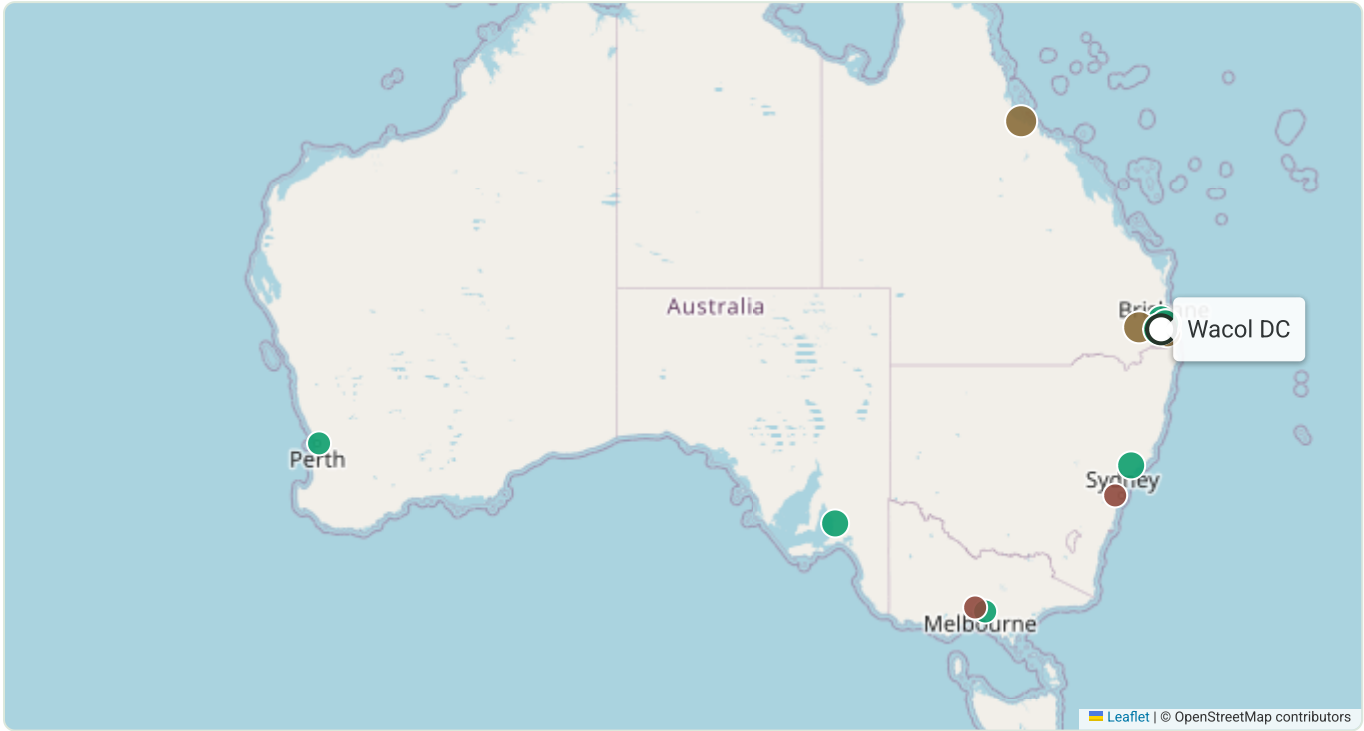

### Where it's going wrong

- Carrier A · Gold Coast: 18 of 64 late (28.1%)
  - Carrier B · Moreton Bay: 7 of 68 late (10.3%)
  - Carrier A · Logan: 5 of 63 late (7.9%)
- 95%+ on time   ● 80–95%   ● under 80% or overdue

Dot size = number of deliveries. Every delivery is in the Excel download.

Deliveries in, from suppliers · last 30 days

|                   |                  |            |                  |                  |
|-------------------|------------------|------------|------------------|------------------|
| Deliveries<br>128 | On time<br>91.9% | Late<br>10 | Overdue now<br>2 | In full<br>90.3% |
|-------------------|------------------|------------|------------------|------------------|

Where it's going wrong

- **Supplier C · Line-haul (road):** 3 of 6 late (50.0%)
- **Supplier D (imports) · Container cartage:** 3 of 8 late (37.5%)
- **Supplier K · Line-haul (road):** 2 of 12 late (16.7%)

● 95%+ on time ● 80–95% ● under 80% or overdue

Dot size = number of deliveries. Every delivery is in the Excel download.
