

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: **September 2026**. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

August 2026

Locked

August 2026 is locked (closed 2 Sep 2026). These numbers won't change.

September 2026

Locked

September 2026 is locked (closed 2 Oct 2026). These numbers won't change.

October 2026

Incomplete

October 2026 is still in progress: figures to 6 Oct only.

In short: **\$162 per new customer in September: 47 new customers from \$7,600 of marketing.**

September 2026

\$162

August \$205

September last year

\$269

32 new customers from \$8,600

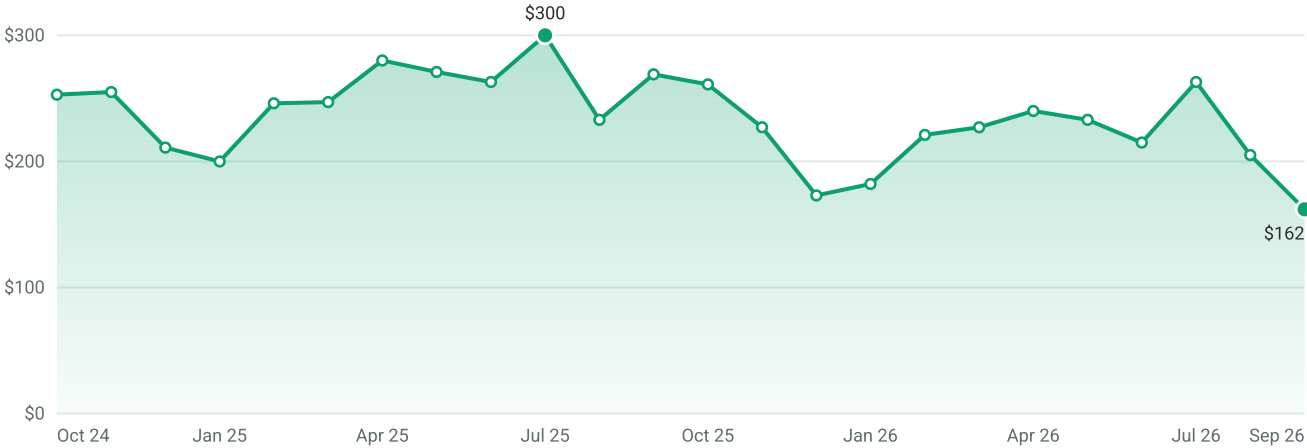

Year to date (Jul to Sep 2026)

\$203

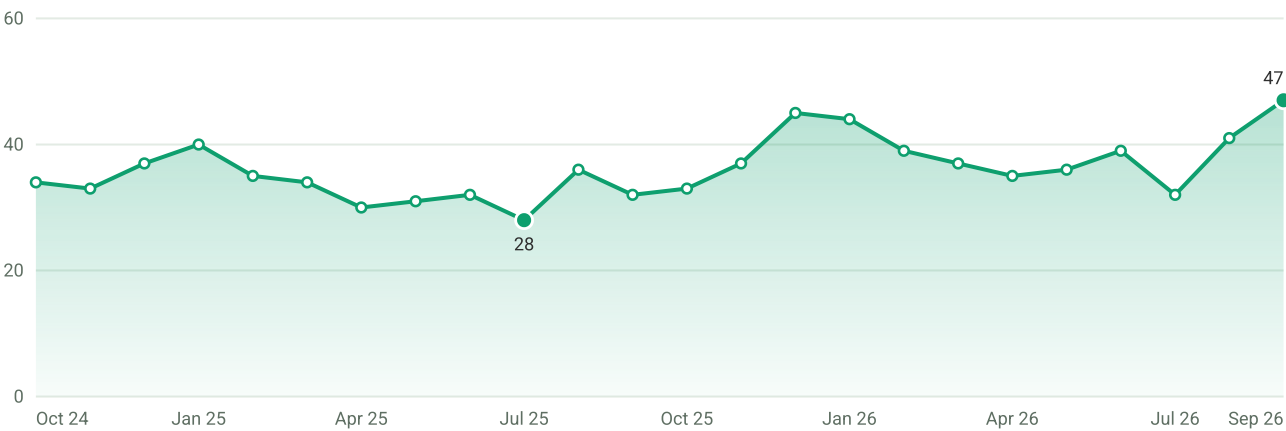

(23.1%) on the same period last year (\$265)

Cost to win a customer, by month

All · \$ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the spreadsheet download.

What it shows
47 new customers came from \$7,600 of marketing in September, against 41 from \$8,400 in August: \$162 each, down from \$205.

What you'd do about it
A lower cost per customer with steady spend usually means the marketing mix is working. Recording where each new customer came from shows the cost per channel.
