Customers are counted in the month of their first job. Every month, by line, is in the Excel download.

What it shows

32 new customers came from \$8,400 of marketing in July, against 39 from \$8,400 in June: \$263 each, up from \$215.

What you'd do about it

Worth knowing which channels brought this month's customers in: recording the source of each new customer shows the cost per channel.
