Gross margin, not profit

Gross margin is not profit. Job gross margin = revenue less materials, subcontractors and technician time charged to the job at \$68 an hour (wages and all on-costs). Not included: technician time not charged to any job (travel, training, waiting), and overheads (office wages, marketing, vehicles, rent, insurance, IT, depreciation, interest). Profit is what's left after those. Wages always include all on-costs: super, payroll tax, workers' compensation insurance and leave.

From gross margin to profit

November's jobs made \$58,844 gross margin (33.7%). Technician time not charged to jobs took (\$3,112) and overheads \$57,960, leaving \$3,996 profit before tax (2.3% of revenue). To cover overheads, jobs need a 31.4% gross margin on average.

Gross margin on jobs	\$58,844
Technician wages and on-costs	\$46,800
Technician time charged to jobs (at cost)	\$49,912
