

SAMPLE DATA · invented figures for demonstration

What does it cost to win a customer?

Period: April 2026. Marketing spend divided by the customers it actually brought in (a customer's first ever job), month by month.

How final is this data?

March 2026

Locked

March 2026 is locked (closed 2 Apr 2026). These numbers won't change.

April 2026

Locked

April 2026 is locked (closed 5 May 2026). These numbers won't change.

October 2026

Incomplete

October 2026 is still in progress: figures to 6 Oct only.

April 2026

\$240

March \$227

April last year

\$280

30 new customers from \$8,400

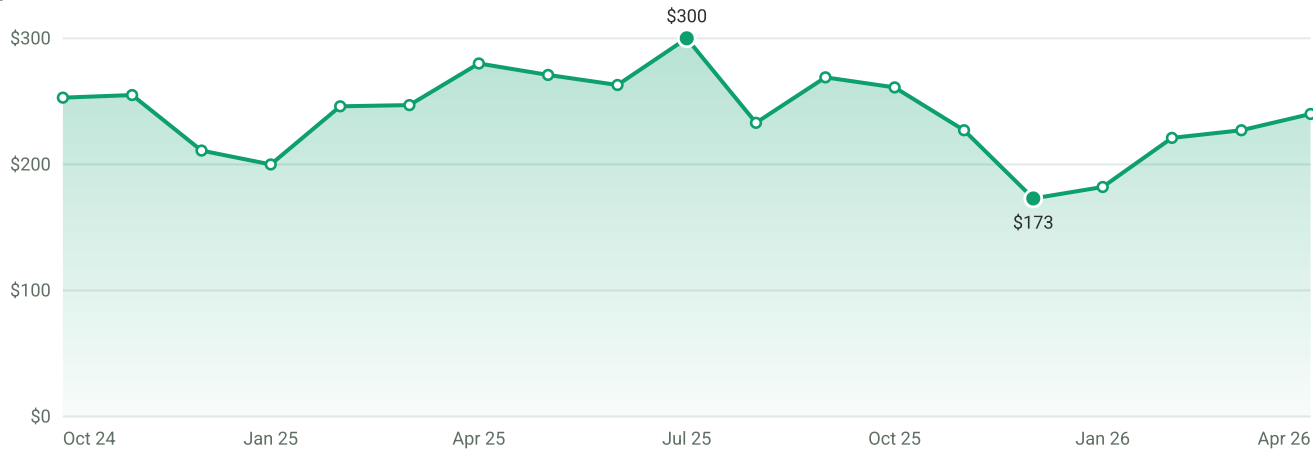

Year to date (Jul to Apr 2026)

\$228

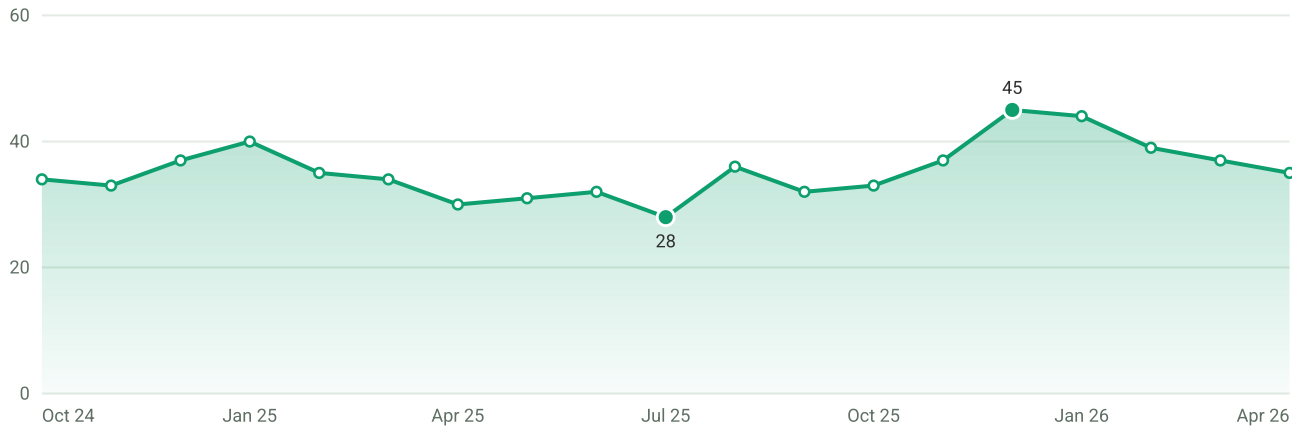

same period last year: not in the data

Cost to win a customer, by month

All · \$ per new customer

All · New customers

Customers are counted in the month of their first job. Every month, by line, is in the Excel download.

What it shows

35 new customers came from \$8,400 of marketing in April, against 37 from \$8,400 in March: \$240 each, up from \$227.

What you'd do about it

Worth knowing which channels brought this month's customers in: recording the source of each new customer shows the cost per channel.
